

PowerBoss Collector 35 Walk-Behind Sweeper

The Collector 35 walk-behind sweeper is compact, easy to maneuver and dependable. This sweeper is designed for years of reliable, long-lasting service. It easily climbs grades of 20%. This heavy-duty sweeper is chain-driven through the rear with an automotive-type differential allowing power forward and manual reverse. Antishock structure minimizes vibration from engine and terrain. A retractable side brush sweeps dust out from corners and from under edges. Dust is controlled by its unique vacuum-effect and 43 ft² dust filters. Dirt is swept into the path of the wide main broom which sweeps it into the Collector 35's 2.5 ft³ hopper.

Specifications

Sweep Path	34" up to 45,000 ft ² per hour
Main Broom	28" width, Chevron bristle pattern
Side Broom	16" diameter, retractable
Filters	5 cartridge filters, 43 ft ² dust filter surface
Hopper	Wet-sweep bypass, automatic filter shaker, 2.5 ft ³
Engines	5HP gas engine or 12V battery system
Construction	Extra-strong, anti-shock metal structure Coated with rustproof epoxy
Brakes	Shock absorbing hood and bumper Service and parking brakes, standard

General Description:

- Cleans 45,000 ft² per hour
- 35" sweep path with side broom
- 28" Chevron bristle main broom
- 16" retractable side broom
- Large 2.5 ft³ hopper
- Wet-sweep bypass
- 5 cartridge filters with 43 ft² surface
- Automatic electric filter shaker
- Automatic vacuum cut-off
- Rear debris collection system
- Side brush activation from control panel
- Vacuum action on side brush
- Battery powered
- Extra-strong anti-shock metal structure
- Coated with rust proof epoxy
- Shock-absorbing hood and bumper
- Service and parking brakes, standard
- Two (2) refuse boxes in hopper, standard
- Ergonomically positioned controls
- Solid rubber rear tires
- Speed up to 3 mph
- Weight: 390 lbs
- W x L x H: 37" x 56" x 34"
